Professional Summary

Software Engineer at Endava with 1+ year experience in building scalable enterprise applications using C#, ASP.NET Core/.NET 8/.Net 10, Angular, TypeScript, SQL Server, EF Core, and REST APIs. Experienced in designing high-volume data ingestion systems, optimizing bulk database processing, developing secure APIs with JWT/RBAC, implementing real-time communication with SignalR, and integrating Gemini AI for metadata-driven schema analysis and intelligent data mapping. Skilled in backend development, performance optimization, automated testing with NUnit/Jasmine, and production-grade observability using Serilog.

Technical Skills

Backend - C#, .NET 8, ASP.NET Core, REST APIs
Frontend - Angular, TypeScript, RxJS, HTML, CSS
Databases - SQL Server, EF Core, SQL Stored Procedures
Data Engineering - Bulk Ingestion, SqlBulkCopy, Batch Processing,Multi-format Parsing
AI & Integration - GeminiAI, Metadata-only Schema Analysis, Column Mapping
Security - JWT, RBAC, CORS, File Ownership Authorization
Real-time & Logging - SignalR, Serilog, SQL/Application/Error Logging
Testing & Performance - NUnit, Jasmine, High-volume Data Processing, Performance Optimization
DevOps - Docker, PowerShell, CI/CD Concepts

Professional Experience

Digital Banking Platform - Endav *August 2025 - September 2026*

Angular, ASP.NET Core, SQL Server, Microservices, API Gateway, Clean Architecture

- Developed a full-stack banking application using Angular, ASP.NET Core, and SQL Server, supporting ac-counts, cards, transactions, loans, and customer support.
- Designed microservices for identity, branches, accounts, cards, transactions, loans, notifications, and support using Clean Architecture and separate databases.
- Integrated an API Gateway to centralize request routing between the Angular frontend and backend microser-vices.

Enterprise Generic Data Ingestion Platform — Endava

Angular, ASP.NET Core/.NET 8, SQL Server, EF Core, REST APIs, SignalR

- Developed a scalable data ingestion platform supporting high-volume processing using SqlBulkCopy, SQL stored procedures, staged batch persistence, and EF Core.
- Implemented multi-format file parsing and validation for XLSX, XLS, CSV, TSV, TXT, JSON, XML, PDF, DOCX, and ZIP files, including duplicate detection, datatype validation, and column mapping.
- Integrated Gemini AI for metadata-only schema analysis, semantic column mapping, confidence scoring, and relationship detection.
- Implemented secure and observable APIs using JWT/RBAC, CORS, ownership validation, SignalR, NUnit/Jasmine testing, and Serilog logging.

Education

NRI Institute of Technology, JNTUK, Agiripalli **Bachelor of Technology (ECE)**
2021–2025 **75%**
